

Regulatory Pharmaceutical Fellowship

2017—2019 Cycle

PURDUE
UNIVERSITY

Regulatory Pharmaceutical Fellowship

The purpose of the Regulatory Pharmaceutical Fellowship is to train selected candidates in one of three tracks focused on the medical and regulatory aspects of drug information dissemination, advertising & promotion, or medication safety. The program serves to maintain and enhance a scientific link among the Food and Drug Administration (FDA), academia, and the pharmaceutical industry. The program also provides an opportunity for the fellow to develop an understanding of the processes of the FDA and the pharmaceutical industry in the delivery of drug information and the regulatory oversight of prescription drug marketing practices. The fellowship gives participants the unique opportunity to experience careers in the areas of government, academia, and industry, thus, qualifying graduates to pursue career opportunities in each respective area.

The fellowship is a two-year program consisting of rotations at Purdue University, Janssen Scientific Affairs, LLC or Eli Lilly, and the FDA.

Global Regulatory Affairs Fellowship

The Takeda/Purdue fellowship program will provide a Doctor of Pharmacy (PharmD) graduate with the opportunity to gain specialized, hands-on training and experience in Global Regulatory Affairs. The fellowship is designed to prepare and develop the PharmD graduate for a career in regulatory strategy and drug development. In addition to bolstering a scientific link between Takeda and Purdue University, the fellowship aims to enhance the regulatory strategy activities at Takeda, with a goal to eventually serve and improve the drug development process across industry.

The fellowship is a two-year Regulatory Affairs Fellowship. The majority of the fellow's time will be spent at Takeda.
