Program Overview

The OSU PGY1 Community-Based Pharmacy Residency prepares community-focused clinical pharmacists with advanced patient care and leadership skills for the delivery of diverse pharmacy services.

Highlights of the program include:
• Three training sites
• Longitudinal ambulatory care learning experience with the focus on chronic disease state management in underserved populations
• Connected with the OSU College of Pharmacy, residents will have numerous opportunities to gain teaching experience as well as research opportunities
• Residents will spend the majority of their time focusing on direct patient care through collaborative practice agreements
• Residents will stay up-to-date on current pharmacy practice by staffing weekly in a community pharmacy

Affiliated Practice Sites

Community Health Centers of Benton and Linn Counties

The Community Health Centers of Benton and Linn Counties provide patient-centered primary care to more than 15,000 patients at six different locations. Pharmacists work closely with other health care professionals under collaborative practice agreements to offer a wide array of disease state management services. These sites offer a variety of services to underserved patients including mental health, family planning, public health initiatives, anticoagulation, diabetes education, chronic pain management, and a 340b dispensing pharmacy.

Oregon State University - Student Health Services

Located on the OSU main campus in Corvallis, OR, the OSU Student Health Services (SHS) Pharmacy offers a unique community pharmacy setting that primarily serves the OSU student body. Pharmacists work closely with other health care providers in a collaborative setting. The resident will engage in a variety of services such as pharmacist provided contraception, direct observation therapy, and travel medicine. The SHS resident also has the opportunity to experience longitudinal ambulatory care rotation at the Community Health Centers of Benton and Linn Counties to provide disease state management services in diabetes and anticoagulation.
